Get the same long-proven performance of TEMCo’s Best Selling POWER-WAVE Phase Converter line in a Panel!

TEMCo’s POWER-WAVE XR-p line of phase converter panels enlist the same proven and rugged design used in the POWER-WAVE Rotary Phase Converter line in the money saving option of a "panel-only" offering.

Just supply your own 3 phase idler motor motor and connect it to the dedicated terminals indicated in the connections compartment. It's That SIMPLE!

XR-p Proven Quality - Dedicated Design - Proven Performance: Since 1968, TEMCo has been refining it’s offerings to meet the popular demands of customers big and small. We understand more than most, that quality costs. We are able provide the refined and proven design features that come with the XR-p as a result of the shear volume produced in the parent XR Rotary Phase Converter line.

Phase Converter Panel Data Sheet

---

**Specifications**

**Idler Motor Required:**
3 HP or 2.2 kW  
1800 or 3600 RPM  
208-240 Volts

Model Number: XR2p  
HP: 3  
kW: 2.2  
Hz: 60

**1-Phase Input**
Amps: calculated based on three phase load x 1.732  
Voltage: 208-240  
Circuit Protection - 15 A  
Input Wire Size: 14 AWG

**3-Phase Output**
Voltage: = input voltage  
Phase Shift: 120°  
Configuration: Delta

**Load Ratings**
CNC Loads & Electronic Loads - kW: 1.3 / Amps: 4.0  
Resistive Loads - Amps: 6  
Motor Loads (max HP start or run) - Easy: 2.0 / Medium: 1.5 / Hard: 1

**Technical Specifications**
Duty Cycle: 100%  
Use: Continuous  
Sound Level (Panel): 0 dBA, measured from 7 meters.  
Sound Level (Idler Motor): Dependant user supplied unit  
Enclosure Rating: NEMA 1  
Dimensions (product): 7" L x 10" W x 8" H.  
Weight (shipping): 15 lbs.

Single Phase TEMCo MAG Starter, Fused Disconnect, or Circuit Breaker: Refer to technical specifications for sizing. For optimal protection, device setting(s) should be based on minimum requirements of three phase load converted to single phase (3-phase load amps x 1.732) but not lower than recommendation in technical specifications.

Single phase supply conductors should be based on circuit protection rating as required by NEC.

Three phase output conductors should be based on circuit protection as required by NEC and the requirement of the three phase load equipment.

Three phase TEMCo MAG Starter, Fused Disconnect, or Circuit Breaker. Refer to three phase load equipment specifications for sizing details.
